The Creation Care and Changing Climate Task Force was established by the Montana Synod Council subsequent to the approval of a 2019 Montana Synod Assembly Resolution to “Care for Creation and

Respond to the Changing Climate”. The purpose of the task force is to assist the synod and its congregations by developing and presenting meaningful and measurable mitigation and adaptation actions that, when implemented by the congregations, will take better care of creation and those who live in it.

The task force is guided by the idea that through our baptisms, God brings us into the divine plan for all of creation. We are equipped by the Spirit, then, to care for others and the world that God has made. Whole-hearted, intentional stewardship of God’s creation is a serious aspect of what it means to be a follower of Christ, doing God’s work with our hands.
